Background

- Comprehensive PMTCT service started in Nepal in February 2005.
- Community-based PMTCT (CB-PMTCT) program is expanded in **55** districts (Global Fund: 32 districts, UNICEF: 14 districts and GoN: 9 districts) where HIV screening and counseling is done among every ANC visitors at the district.
- Free ARV drugs are available from **65** ART sites in **59** districts from where HIV-positive mothers can receive treatment.
- Early Infant Diagnosis (EID) service is available for babies born to the HIV-positive mothers.

Table 2: Services Statistics on PMTCT in Nepal: 2005/2006 – July 2016

Indicators	2006	2007	2008	2009	2010	2011	2012	2013	2014	2015	2016 Jan-July
Tested for HIV (ANC & Labour)	28,485	32,553	42,733	65,791	94,511	124,025	129,131	142,043	158,146	187,552	167,395
HIV Positive pregnant women	71	59	84	133	138	169	175	125	162	88	105
Total deliveries by HIV+ve mothers	48	38	61	96	120	134	110	139	131	115	77
Mothers received ART	35	28	47	77	96	117	126	142	162	145	101
Babies received Prophylaxis	38	34	57	89	112	129	108	136	127	114	74

Early Infant Diagnosis (EID):

DNA PCR test for HIV exposed babies below 18 months.

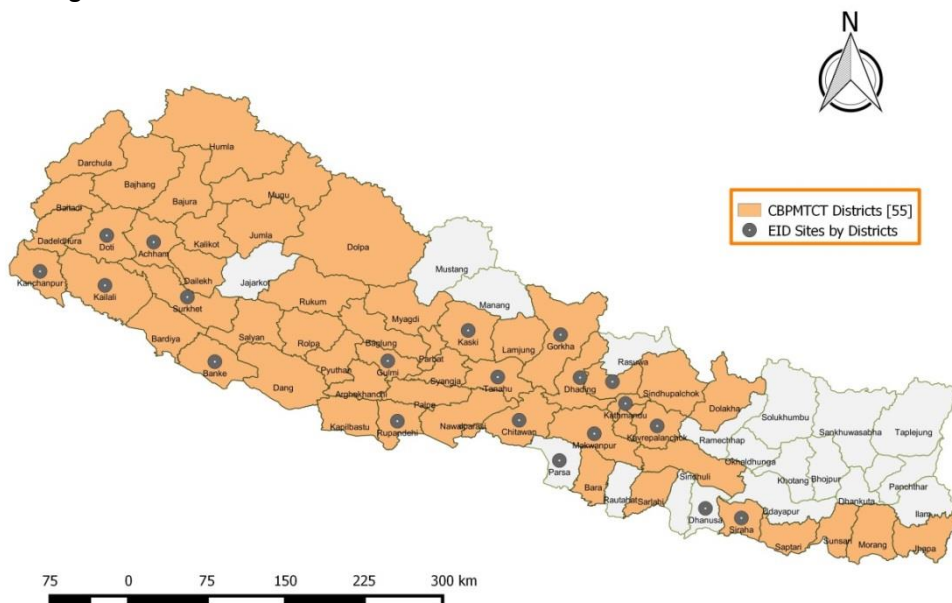

EID through DNA PCR technology is available at National Public Health Laboratory (NPHL), Teku since September 2014.

Dried blood spot (DBS) samples for EID are collected from 26 sites.

Table 3: Early Infant Diagnosis Program

SN	Indicator	2014	2015	2016 July
1	Total number of children up to 18 months tested (PCR)	74	191	101
2	Total number of children up to 18 months diagnosed positive through PCR test	4	15	6
